

Jagdish Bisht

UI/UX & PRODUCT DESIGNER

Summary

UI/UX & Product Designer with 2.6+ years designing B2B and B2C apps, dashboards, and websites for US and UAE market clients. Runs end-to-end UX research – stakeholder interviews, usability testing, and UX audits – and helped ship an in-house AI lead-generation product that lifted conversion from 2% to 8% in the UAE market. Fluent in AI assisted design workflows (Claude Code, Claude Cework) to move from research straight to dev-ready prototypes.

Experience

Code Brew Labs (Mohali, India)

Product Designer (UI/UX) | Jan 2026 – Present

- Design AI-based product agents and B2B product experiences in close collaboration with developers and marketing
- Led UX research and audits on ad landing pages for an in-house AI product, raising lead-generation conversion **from 2% to 8%** in the UAE market
- Use **Claude Code** to build dev-ready, near-production prototypes in place of static Figma mockups, cutting developer ramp-up time
- Use **Claude Cework** to accelerate research and analysis workflows across projects
- Analyze user behavior with **Microsoft Clarity**, **Google Analytics**, and UX Magic to inform design decisions

SmartInfo Care Solutions (Mohali, India)

Graphic & UI/UX Designer | Aug 2025 – Jan 2026

- Designed apps, dashboards, and websites for US-based B2B and B2C clients
- Owned end-to-end UX for a Kindle-competitor e-reader app – **stakeholder**, **User interviews**, user research, usability testing, and behavioral analysis
- Drove research from discovery through validation to support product market decisions

Brillica Services (Dehradun, India)

UI/UX & Graphic Design Intern | Mar 2024 – Jan 2025

- Delivered brand identity for Nishana and a full UI/UX redesign for Gadgeon Middle East
- Built application case studies for an e-learning platform and an e commerce UI/UX experience
- Conducted user research and **analyzed data** to identify design opportunities and inform design decisions
